### DESCRIPTION

Cleaning hose capable of handling relatively high pressures of 20 bar for water and 6 bar for steam, making it a particularly great choice for environments like processing and filling plants, or wherever washdown and cleaning with hot water and steam is required. Although designed for cleaning, the Foodsteam can also double up as a transportation hose for non-fatty food. It has a large temperature range, and is capable of withstanding temperatures from -40°C to +164°C. It can be stored on hose reels, is free from phthalates, and meets major regulations for food contact materials. Maximum working pressure with steam +164°C are 0,6MPa Maximum working pressure with water +95°C are 2,0MPa
