

1902-xx

STEEL PIPE E-COATED*

SPECIFICATIONS

DESCRIPTION

Manufactured in accordance with EN 10305-4 (DIN 2391/C). Normalised, eddy current-controlled, phosphated. These tubes are particularly suited for hydraulic and pneumatic systems. We stock these tubes in E235 quality as standard. The density of both phosphated and non-phosphated tubes is tested by eddy-current testing. The tubes are stocked in manufactured lengths of 6 000 mm. Certificate EN 10204/3.1 can be obtained at an additional cost.
