## PLUG-IN FITTING 45°

### SPECIFICATIONS

<b>Material</b>	Steel	<b>Shape</b>	45°
-----------------	-------	--------------	-----

### DESCRIPTION

The Plug-in fitting 45° is a steel coupling designed for hydraulic systems, featuring a precise 45° angle to ensure optimal fluid flow and connection reliability. Crafted from durable steel, this fitting offers strength and longevity, making it ideal for demanding hydraulic applications. Its design supports secure and efficient coupling within the hydraulic family.
