FERRULE P.T.F.E. / TEFLON SMOOTH

SPECIFICATIONS

Material Steel

Related Item: 1092-01

DESCRIPTION

The Ferrule P.T.F.E. / Teflon smooth is a steel ferrule designed for non-skive hydraulic coupling applications. Its smooth Teflon surface ensures reliable sealing and durability, making it an essential component in hydraulic systems requiring secure and efficient connections. This product belongs to the Coupling - Hydraulic family, combining robust material with precise functionality.
