

4200-40S

FERRULE

SPECIFICATIONS

Material Stainless steel

DESCRIPTION

The Ferrule is a stainless steel component from the Coupling - Hydraulic family, designed specifically for non-skive applications. Its durable material ensures reliable performance and longevity in hydraulic coupling systems, providing secure and efficient connections.

Item number	Size 1
42004006S	3/8"
42004008S	1/2"
