

4701-xx1

BSP STRAIGHT

SPECIFICATIONS

Type 1	Female, swivel	Shape	Straight
Material	Steel		

DESCRIPTION

Hydroscands 47-series swage fittings offer a larger and more flexible range of fittings for spiral hoses. The 47-series fittings do not require internal skiving, which makes installation easier and also saves time and less machine equipment is needed. Depending on the hose type, the fitting can be used completely without skiving, while some hose types require external skiving. The wider range with more fittings means that we can easily solve installations with hose and line components on machines where the space is smaller and requires a more compact hose installation. All fittings are manufactured in one piece. Correct assembly provides a secure connection, follow our assembly instructions.

Material: Free-cutting steel.

Surface treatment: E-coated Fe/Zn 8 P1T.

Temperature range: -40°C - +120°C
