| <b>Material</b> | Steel    | <b>Shape</b> | Straight |
| <b>Standard</b> | DIN 2353 |              |          |

### DESCRIPTION

The GE – GB Body Straight body with male G-thread is a steel coupling adapter designed for reliable and durable connections. Featuring a straight shape with male G-thread connections on both ends, it ensures secure fitting in various industrial applications. Its robust steel construction provides strength and longevity within the Cutting ring coupling family.
